ARRSATH SHERIFF J

+91 9344665342 | arrsathsheriff37@gmail.com | LinkedIn:Arrsath sheriff j | GitHub:Arrsathsheriff

SUMMARY:

Computer Science and engineering graduate with a strong foundation in **Data Structures & Algorithms**, OOP, and problem solving**. Java Backend Developer** with hands-on experience in Java, Spring Boot, RESTful APIs, Spring Security, JPA/Hibernate, and PostgreSQL, focused on building efficient and scalable backend applications.

SKILLS:

Programming Languages: Java, SQL, JavaScript
Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs
Frontend: React.js, HTML5, CSS3, JavaScript
Database: PostgreSQL and Oracle SQL
Concept: Object Oriented Programming (OOP), Multithreading, JDBC, Java 8 Features , SDLC, Operating System

EDUCATION:

KCG College of Technology, Karappakam, Chennai 2022-2026

Bachelor of Engineering in **Computer Science and Engineering** CGPA: 7.54

EXPERIENCE:

Full Stack Java developer Intern**,** May 2026-Present

Pentagon space, Vijayanagar, Bangalore

PROJECTS:

Event Ticket Platform | Java, Spring Boot, PostgreSQL, React | Backend Development:

- Built a web based event ticketing platform using Java and Spring Boot, enabling organizers to create events, configure multiple ticket types, and manage ticket availability.
- Developed secure RESTful APIs using Spring Boot, Spring Security, JPA/Hibernate, and PostgreSQL, implementing authentication and authorization for event organizers and attendees.
- Implemented ticket purchasing, sales and attendance management with QR-code based ticket validation, preventing ticket overselling and duplicate ticket usage while enabling staff to verify tickets at event entry.

Read Flow | Java, Spring Boot, PostgreSQL, Redis, React | Backend Development:

- Built a reels style book discovery platform with 100+ books and 300+ curated passages, enabling users to discover, like, bookmark, and explore content through an infinite-scroll feed.
- Developed secure RESTful APIs using Spring Boot, Spring Security, JWT, JPA/Hibernate, and PostgreSQL, implementing authentication and role-based access control for users and administrators.
- Optimized feed performance using PostgreSQL indexing, achieving sub 200ms average API response time during local load testing and validating 30+ API test cases using Postman.

Health Bridge | Java, Spring Boot, PostgreSQL | Backend Development

- Developed backend functionality for a digital healthcare platform connecting patients and doctors, supporting online consultations, appointment booking, and medical record management.
- Built secure RESTful APIs using Spring Boot, Spring Security, JWT, and JPA/Hibernate, implementing user authentication and role-based access control for patients, doctors, and administrators.
- Implemented database-driven workflows using PostgreSQL for appointment scheduling and medical record management, enabling reliable storage, retrieval, and role-specific access to healthcare data.

ACHIEVEMENTS:

Solved **150+ DSA problems in Java** across platforms such as **Leetcode and HackerRank**.

Secured a **Top 5 Position** in INNOTHON'24 Hackfest conducted by Hindustan institute of Technology and science.
